

The May
BDPA -RICHMOND meeting
will be a presentation by Microsoft on the next release of Windows, Office and
Exchange Server 2007!!!

THIS WILL BE AN AWESOME PRESENTATION!!

Please send an eMail to
Richmond@culminis.com with the
SUBJECT: "BDPA RICHMOND ##"
(where the "##" is the number of people in your group.)

**IT IS URGENT THAT EVERYONE RESPONDS
IMMEDIATELY, EVEN IF YOU CAN ONLY STAY FOR
ONE HOUR!!**

This presentation is part of our Culminis User Group. It will include Door Prizes and Refreshments. In order to make sure that this event gets confirmed, everyone who plans to attend MUST confirm their reservation to ensure there are enough refreshments. This meeting will be held on **Wednesday, May 31st** at the Holiday Inn Crossroads across from our normal meeting place at Anthem. The time is 5:00 P.M. to 9:30 P.M.

Culminis requests that each attendee be included in an RSVP email to richmond@culminis.com to insure that there is enough seating and food. Please include the number of people attending, the group you are a member of and what city the event will take place in the subject line of the RSVP.

Subject Content

Microsoft Vista - This presentation will serve as a deep dive into an IT Pro's workflow centering on the day to day activities that are typical in desktop management. We will illustrate the deployment tools, management interfaces, GPO, and additional features. Our goal is to represent a real "day in the life" approach for IT Pros, highlighting how Windows Vista will make your day more productive with topics such as Booting and Resuming Windows, Recovering from System Errors, New Event Viewer, Forwarding Events & Subscriptions, Scheduling Tasks and Diagnosing Performance Issues.

Microsoft Office has evolved from a suite of personal productivity products to a more comprehensive and integrated system. This session, will provide a look into the new components around enterprise content management, collaboration, and business intelligence, and how the new, but familiar results-orientated user interface will help you and your organization produce better results faster.

Exchange Server 2007, the next major version of Exchange, will be a leap forward in enhancing the information worker's access to larger mailboxes while giving the email administrator a more manageable and secure email infrastructure. This session will provide an overview of the product direction and provide a sneak peak at some of the new features that will be included in the product.
